

Steam Flow

Pressurized and Atmospheric Deaerators

Steam Flow Deaerator
Pressurized .005 cc/liter

CONSTANT RECYCLING guarantees deaeration of all dissolved oxygen in excess of .005 cc/liter from 0% to 100% of deaerator capacity.

Steam Flow Deaerator Pressurized .005 cc/liter

When to use

| | |
|-------------------------------------|-----|
| 100% Makeup 0% condensate | Yes |
| 30% Makeup 70% condensate | Yes |
| High Pressure condensate returns | Yes |
| 100% Turndown | Yes |
| Load Swings | Yes |

FFEATURES

CONSTANT RECYCLING guarantees deaeration of all dissolved oxygen in excess of .005 cc/liter from 0% to 100% of deaerator capacity.

ELECTRONIC INSTRUMENTATION FOR MODULATING LEVEL

includes a HART compatible differential pressure transmitter, PID controller, and motorized control valve.

SEPARATE DEAERATING & MIXING SECTIONS offer a two stage continuous cycle which provides .005 cc/l deaerated water during all load conditions regardless of surges from the system.

ONLY STAINLESS STEEL

components come in contact with undeaerated water.

A.S.M.E. CODE and NATIONAL BOARD

stamped receivers at 50 psig is standard.

CUSTOM ENGINEERED PACKAGED

SYSTEM and low NPSH pumps require a small foot print and minimal headroom.

Testing Requirements

This system requires steady state conditions per the ABMA testing procedure.

ADVANTAGES

Industrial Steam's exclusive constant recycling feature, and the use of a partitioned receiver, provide the advantages of a two-tank system as a single package. These advantages are available without the necessity for onsite erection or field installed piping. Expanded deaerating sections are standard for surge condensate loads.

GUARANTEED PERFORMANCE FROM 0% to 100% of capacity regardless of load conditions is unmatched by any other deaerator. The **STEAM FLOW** also carries a 10-year vessel guarantee without the use of a lining.

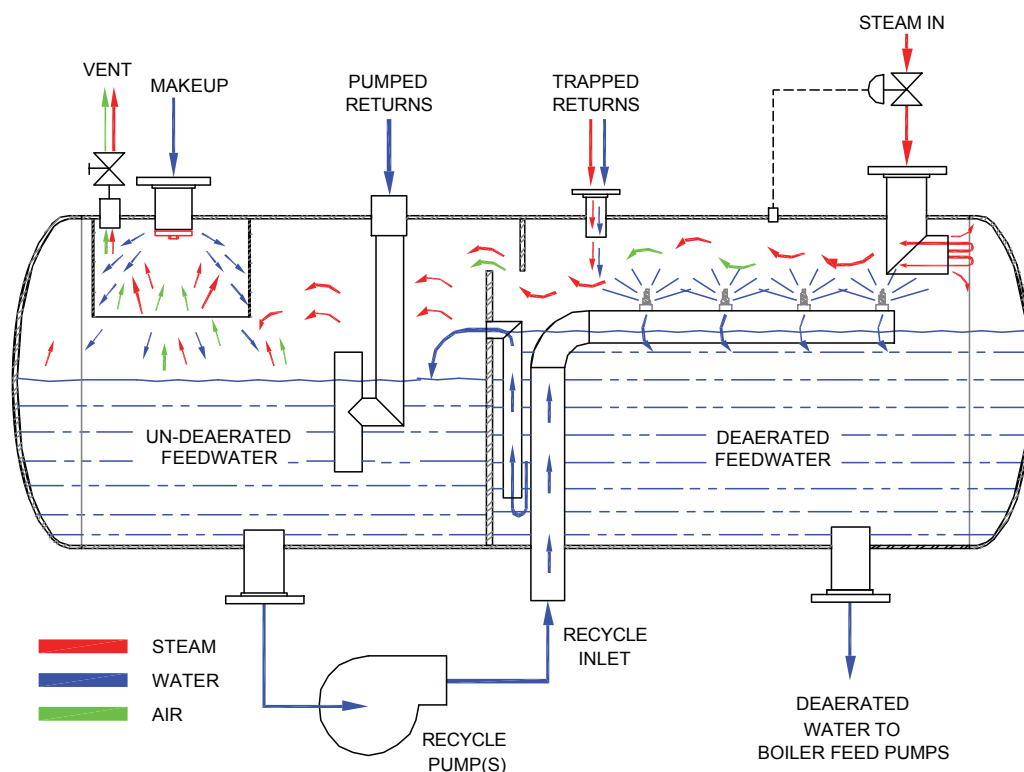

CUSTOM ENGINEERED PACKAGED SYSTEM and low headroom with low NPSH pumps. Selection of quality components insures reliable service, and there is a single source of responsibility for all major components.

OPERATION

Makeup water is sprayed through a stainless steel spring-loaded nozzle into a stainless steel internal vent condenser which is located in the mixing section. This incoming water is heated instantly by direct contact with steam. Returned condensate enters below the water level to eliminate pressure decay caused by surging returns.

The deaerated water is then pumped into the deaerating section where it is blasted through stainless steel wide angle, full-cone unrestricted nozzles. The last traces of oxygen are shaken out at the source of the purest steam. The pumped transfer rate is approximately 125% of deaerator capacity, which enables the deaerator to furnish the boiler with deaerated water from start up. Deaeration is accomplished from 0% to 100% load, and thermal stratification is eliminated.

Excess deaerated water, which is not required by the boiler, recycles into the deaerating section through the compartment overflow. This deaerated water is blended with makeup water and is constantly rescrubbed. Non-condensable vapors are expelled from the top of the deaerator through the internal vent condenser.

Components and Sizing

- | | | | |
|------------------------------------|---|--|--|
| 1 Gate Valve (Vent) | 11 Recycle Pump | 22 Suction Gate Valve (Recycle) | 32 Discharge Check Valve (Recycle) |
| 2 Level Transmitter | 12 Boiler Feed Pump Motor | 23 Safety Valve (Set @ 50#) | 33 Low Water Alarm & Cut-off Switch |
| 3 Level Controller | 13 Boiler Feed Pump | 24 Sentinel Relief Valve: (Set @ 50#) | 34 High Water Alarm Switch |
| 4 Make-up Control Valve | 14 Suction Coupling | 25 Temperature Gauge w/thermowell (50 DEGREE - 500 DEGREE F) | 35 Emergency By-pass |
| 5 Spence Valve | 15 Suction Ball Valve | 26 Sight Glass Assembly | 36 Ball Valve (Drain) |
| 6 Starter | 16 Ball Valve (Column Drain) | 27 Orifice Union | 37 Y-strainer (Steam Inlet) |
| 7 Discharge Pressure Gauges w/cock | 17 Control Panel (Nema 1) | 28 Ball Valve (Recirculating) | 38 Overflow Trap |
| 8 Spray Nozzles | 18 Globe Valve (Make-up Inlet) | 29 Check Valve (Recirculating) | 39 Chemical Feed Quill |
| 9 Spray Scrubbing Manifold | 19 Ball Valves (Make-up Inlet) | 30 Discharge Pressure Gauges w/cock (Recycle) | 40 Ball Valve (Column Isolation Valve) |
| 10 Recycle Pump Motor | 20 Y-strainer (Make-up Inlet) | 31 Discharge Ball Valve (Recycle) | |
| | 21 Suction Discharge Coupling (Recycle) | | |
